PROFESSIONAL

EXPERIENCE **University of Alabama at Birmingham, School of Public Health Department of Biostatistics**

Assistant Professor

July 2016 to Present

West Virginia University, School of Public Health Department of Biostatistics

Assistant Professor

August 2012 to July 2016

Graduate Studies Coordinator

July 2013 to June 2016

West Virginia Clinical and Translational Science Institute Clinical Research Design, Epidemiology, and Biostatistics Program

Co-Chair

September 2015 to July 2016

University of North Carolina-Chapel Hill Department of Biostatistics

Graduate Research Assistant

Spring 2008 to August 2012

- Breastfeeding, Antiretroviral, and Nutrition (BAN) Protocol under Michael Hudgens

Training Grant Recipient

August 2006 to August 2010

- Environmental Biostatistics Training Grant, National Institute of Environmental Health Sciences, 2006-2010

Tennessee Technological University Department of Mathematics

Graduate Teaching Assistant

August 2004 to May 2006

EDUCATION **University of North Carolina**, Chapel Hill, North Carolina, USA

Ph.D., Biostatistics, December 2012

- Dissertation Topic: “Causal Inference and Principal Stratification: Competing Risks, Bounds, and Surrogates”
- Advisor: Michael G. Hudgens

Tennessee Technological University, Cookeville, Tennessee, USA

M.S., Mathematics, May 2006

- Thesis Topic: “A Semiparametric Approach to Linear Regression”
- Advisor: Michael Allen

Tennessee Wesleyan College, Athens, Tennessee USA

B.S., Mathematics, *Cum Laude*, May 2001

- Minor in Chemistry

CURRENT FUNDING	P30-AI027767 Saag (PI) 06/01/14–05/31/19 UAB Center for AIDS Research The UAB Center for AIDS Research (CFAR) will stimulate and facilitate HIV/AIDS research that has high local, national, and international impact and in so doing will promote the NIH priorities of innovation and effectiveness in AIDS treatment and prevention. Role: Investigator
	P50-AR060772 Dino (PI) 09/30/16–09/29/19 West Virginia Prevention Research Center WV has one of the worst health profiles in the nation with high rates of tobacco use, obesity

and related chronic diseases. The WV prevention research center will partner with state and local health departments and others to conduct applied public health research, evaluation, technical assistance, and training. We expect to provide cost-effective strategies, programs, and products that reduce health disparities and to promote a cultural norm where healthy behavior is accepted and practiced.

Role: Subcontract Principal Investigator

N/A HSRA Mugavero (PI) 01/01/18–12/31/22

Data 4 CARE Alabama (D4C AL): Clinics Achieving Retention And Engagement by Implementing CDC EBIs via the Alabama Regional Quality Group

This project proposes a structural-level approach using readily available clinic-wide appointment data to categorize people living with HIV/AIDS as low-, intermediate-, or high-risk for poor. An evidence-informed intervention will be delivered to intermediate- and high-risk individuals in efforts to increase retention in care and viral suppression. Seven HIV clinics across the state of Alabama will provide data and implement the intervention under the auspices of the team at UAB providing training, data capture and rigorous evaluation.

Role: Co-investigator

R01MH115754 Merlin (PI) 07/01/18–06/30/23

Evaluation of the Efficacy and Mechanisms of a Novel Intervention for Chronic Pain Tailored to People Living with HIV

The overall objective of this proposal is to evaluate a novel theory-based Pain Self-Management intervention, Skills TO Manage Pain (STOMP), developed for and tailored to people living with HIV (PLWH). This approach incorporates novel peer co-led group sessions that were created based on our formative intervention development work, and includes patients with comorbidities (e.g., depressive symptoms, addiction history) common among PLWH but typically excluded from chronic pain studies. This study also investigates the impact of a chronic pain intervention on disease-specific HIV outcomes in addition to pain and function.

Role: Co-investigator

1R01NR018391-01 Webel, Willig (PI) 09/26/18–06/30/23

Impact of physical activity routines and dietary intake on the longitudinal symptom experience of the people living with HIV (PROSPER-HIV)

Strategies to reduce the high symptom distress among people living with HIV (PLHIV) are urgently needed. Our study examines how two promising symptom management strategies, physical activity and good dietary intake, impact symptom burden and intensity among PLHIV over time. These strategies can be incorporated into ongoing health promotion initiatives in HIV specialty clinics nationwide.

Role: Co-investigator
